

Family Link

Help your family create healthy digital habits.

Whether your children are younger or in their teens, the Family Link app from Google can help you find a balance with technology together. Set digital ground rules to help guide them as they learn, play, and explore online on their Android or Chrome devices.

Manage the content they see

- Approve or decline the apps your child wants to download from the Google Play Store
- Remotely hide apps on their device at any time
- Restrict what content they can see in the Play Store by maturity rating
- See activity reports showing how much time is spent on their favorite apps

Manage the amount of time spent on their device

- Set a daily limit for each day of the week
- Set a device bedtime
- Remotely lock your child's device anytime

Be Internet Legends.

Be Internet Legends helps children to make the most of the internet by teaching them the skills they need to be safer and more confident online.

Think Before You Share

I will thoughtfully consider what I share and with whom, and keep extra-sensitive information to myself (such as my home address, current location, or other people's business).

Check it's For Real

I will watch out for phishing and scams, and report questionable activity every time.

Protect Your Stuff

I will take responsibility for protecting important information by crafting strong and unique passwords with characters, numbers, and symbols.

Respect Each Other

I will spread positivity and use the skills I have learned to block and report negative behaviours.

When in Doubt, Discuss

I will use my voice when I notice inappropriate behavior and seek out a trusted adult to discuss situations that make me uncomfortable. Because that's what it takes to be a safe and fearless explorer of the online world.
